EVO Charge Powered by NGT

EVO Charge is a user friendly windows application that lets you process card transactions from your desk top computer. Transactions are handled just as though you were using a traditional POS terminal.

EVO Charge software turns any PC into a payment-accepting and processing device without interfering with other programs. The application offers intuitive menu screens with action buttons that guide users through the program. *EVO Charge* supports a wide range of peripherals, making it easy to accept all payment types including credit, debit, EBT, and gift/loyalty. *EVO Charge* software processes transactions through the use of a Windows-based system and is fully validated by Visa's Cardholder informations security program.
