## Secure Mobile Transaction Processing

### Are you Mobile?

**eProcessingNetwork** makes wireless transaction processing available **at swiped rates** through common smartphones, cellphones and PDAs.

The **ePNMobile** Credit Card and Check Transaction Processing Application can prompt for invoice number, gratuity, other charges, process the transaction in real-time, and show the transaction authorization number **right on the phone display**. You can even capture Customer's signatures on many touch-screen enabled devices.

### Merchant Benefits

- **Fraud Prevention:** Real-time credit card and check processing, get approval or decline response at time of sale.
- **Lower Cost:** Lower investment than dedicated wireless transaction processing units.
- **Swiped Rates:** Reduced rate with Card swipe transactions from credit card processors.
- **Real-Time Processing:** No chasing after customers for declined transactions.
- **Ease Of Use:** Less time consuming than phone-in (voice) processing.
- **Reporting:** Online tracking and transaction reports.
- **Multi-Function Device:** Phone, email, texting and credit card/check terminal.

The entire process is simple and convenient to use. **eProcessingNetwork** offers reliable and secure credit card, check and gift card/loyalty transaction processing services and professional support every step of the way.
